

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF THE PRESIDENT.

HON. WILLIAM D. STEPHENS,
Governor of California.

SIR: The Board of Directors of the Industrial Home for the Adult Blind presents the financial and industrial report of that institution for the biennium ending June 30, 1920.

The Home continues to fulfill the object for which it was founded in maintaining the open door of hope for the men and women of the state who have suffered the capital misfortune of blindness in adult age. It strands them between a past whose activities forever cease and a future in which experience is no guide.

In dealing with them the state must note the difference between them and that less numerous class of defectives, the deaf mutes. The latter class find their condition to but little impair their self-supporting capacity. Practically every trade and handicraft is open to their entry and their earning capacity is normal.

But the adult blind are limited to a very narrow range of industrial activities. They must learn a new trade, handicapped by blindness and at an age when coordination of hand and brain is impaired.

Very few attempt a change in handicrafts when in possession of all their senses. But this must be done by all the adult blind, and this institution is to supply them with the facilities for making the radical change in their lives and activities required by their loss of sight.

The financial and industrial report in the appendix shows how well this institution is serving the humane purpose for which it was founded. The blind inmates are paid higher wages than in any similar institution in the world and their skill is such that their products find a ready and increasing sale in the open market in competition with the products of shops run by full sighted workmen.

But the financial and industrial report does not tell the whole story, because it cannot be told. The light of happiness that shines in this dark world wherein live the blind, is ineffable and not physical. It is a torch lighted when the blind find honest and useful manual occupation, by which they can earn and eat the bread of independence. Work keeps them in fellowship with the great world in which they move but see not. The state supports many institutions, punitive, eleemosynary, reformatory and curative, but this is the only one in which the state promotes human happiness in the lives of the afflicted, who otherwise would not only walk in darkness but in the keenest of unhappiness.

This mission of the Home should impress the state with its duty to those who in darkness knock at the door, but cannot come in because the

institution is crowded to its capacity. A new dormitory is badly needed. Without it the long waiting list of worthy blind must wait in vain.

The cost of such a building is trifling compared with the demands of other institutions that have not a function as high and as necessary as this. There are waiting soldiers who lost their sight in the service of their country, and many men and women whose pursuit of happiness has ceased by reason of blindness, and can be renewed only when the doors of this Home open to them. So, I beg to assure the legislature that no act can secure stronger approval of the taxpayers than an appropriation for another dormitory for the Home of the Adult Blind.

JNO. P. IRISH,
President of the Board of Directors.

Subscribed and sworn to before me this fourth day of December, 1920.

(SEAL)

HOWARD J. PEIRSOL,
Notary Public in and for the County
of Alameda, State of California.

ATTENDING PHYSICIAN'S REPORT FOR THE YEAR
ENDING JUNE 30, 1919.

*To the Honorable Board of Directors of the
Industrial Home for the Adult Blind.*

GENTLEMEN: I have the honor to submit to you my third annual report ending June 30, 1919.

The general health of the inmates has been very good during the year.

During the past year we have admitted:

Males -----	9
Females -----	2
Total -----	11

Nationalities.

American -----	9
English -----	1
Swedish -----	1
Total -----	11

Causes.

Accident -----	3
Broken retina -----	1
Brain tumor -----	1
Blood clot at base of the optic nerve -----	1
Cataract -----	1
Eye strain -----	1
Eyes affected since birth -----	1
Glaucoma -----	1
Uncertain -----	1
Total -----	11

Deaths.

Acute cardiac dilation -----	1
Chronic catarrhal bronchitis -----	1
Consumption -----	1
Total -----	3

Respectfully submitted.

A. F. MAINE,
Physician.

SUPERINTENDENT'S REPORT FOR THE YEAR ENDING
JUNE 30, 1919.

To the Board of Directors,
Industrial Home for the Adult Blind.

GENTLEMEN: In compliance with the provisions of the act governing this Home, I herewith submit to you my report of the affairs and conditions of the institution for the year ending June 30, 1919.

Reference to the financial report hereto appended will show that the total expenditure for salaries and support during the year under review was \$44,959.93, and that the monthly average of inmates actually in residence was 135. The per capita cost per inmate was therefore \$333.03. For groceries and provisions there was expended \$17,098.94. This gives us a per capita cost of \$126.65 a year, \$2.43 a week, and 34½ cents a day for food.

The number of employes being 26, the total population was 161. The average cost for food for this number was \$106.20 for the year.

It will be noted that the sum of \$7,030.70 belonging to the Adult Blind Fund was used for the maintenance of the Home. This was necessary owing to the depletion of the state appropriations for salaries and support.

Examination of the statement of the "Adult Blind Fund" under which the shops operate shows that the receipts for the year were \$62,797.20, and expenditures \$53,189.22. Out of this sum \$11,233.31 was paid in wages; \$1,956.70 only going to sighted employes, while \$9,276.61 was paid in wages to inmates for work in the shops.

The receipts show an increase of 25 per cent over the previous year and 76 per cent over the year ending June 30, 1917.

For the current biennial period the following appropriations were made:

Salaries -----	\$35,000 00
Support -----	55,000 00
Repairs and improvements -----	4,500 00

Owing to the many pressing needs the Legislature failed to pass the appropriation of \$90,000 for a new building and heating plant. This has militated against the expansion of work in the interest of the blind of the state. The institution is crowded, and there are many applications for admission on file. It is also impossible to further expand the industrial features unless more room is provided. In very meager quarters we have opened a basket shop and have procured a loom for weaving rugs. This department provides work for some twelve inmates.

With the appropriation of \$4,500 for improvements the capacity of the warehouse has been doubled, the incinerator has been rebuilt, and plans for improving the water supply completed. The latter plant is now functioning satisfactorily and we apparently have an ample supply of water from the tunnels for all purposes.

At the last session of the Legislature an addition was made to the code affecting this institution giving power to the Board of Directors to appoint teachers to work among the blind in the state who are not inmates of the Home. However, no appropriation was made for carrying on the work. It was hoped that the profits of the industries of the Home could be used for that purpose but these profits have been used during the year to make up the deficit in the appropriation for maintenance of the Home. It would appear, owing to continued rise in price of commodities, that these profits will again be requisitioned at the end of the current year to make up the deficiency in appropriations.

On behalf of the inmates, as well as the management, I extend thanks to those many good people who have, by reading and entertainment, contributed so much to the happiness of those in the Home.

In closing I wish to thank the Directors for their kindly interest and advice in all matters pertaining to the management of the Home and to thank the officers and employees who have so willingly cooperated in the work that is before us.

Respectfully submitted.

DOUGLAS KEITH,
Superintendent.

ATTENDING PHYSICIAN'S REPORT FOR THE YEAR
ENDING JUNE 30, 1920.

*To the Honorable Board of Directors of the
Industrial Home for the Adult Blind.*

GENTLEMEN: I have the honor to submit to you my fourth annual report ending June 30, 1920.

The general health of the inmates has been good during the year. During the year we admitted:

Men -----	11
Women -----	2

Nationality.

United States -----	10
Norway -----	1
England -----	1
Sweden -----	1
Total -----	13

Causes.

Accident -----	5
Fluid between sight of eye and optic nerve -----	1
Inflammation -----	2
Atrophy of the optic nerve -----	2
Glaucoma -----	1
Unknown -----	1
Scarlet fever -----	1
Total -----	13

Deaths.

Pneumonia -----	1
Suicide -----	1
Total -----	2

Sanitary conditions are very good.

Respectfully submitted.

A. F. MAINE,
Physician.

Superintendent's Cottage.

Administration Building, South Side.

SUPERINTENDENT'S REPORT FOR THE YEAR ENDING
JUNE 30, 1920.

To the Board of Directors,

Industrial Home of Mechanical Trades for the Adult Blind.

GENTLEMEN: I have the honor herewith to submit my report and statements for the year ending June 30, 1920, together with data as to cost of maintenance, as required by the act establishing the Home.

The expenditures for the year for maintenance were as follows:

Salaries and wages -----	\$17,724 75
Groceries and provisions -----	19,929 95
Service and expense -----	12,000 43
Total -----	\$49,655 13

The average number of inmates on the roll during the year was 138, while the monthly average actually in residence was 133. The cost per capita based on the latter figure for the year was, therefore, \$373.35.

The sum of \$19,929.95 being spent for groceries and provisions, the cost of food per capita for the year on the total population of the Home (162) was \$123.02 or \$2.36½ per week.

As the detailed statement of the Adult Blind Fund appended will show, the year has been a successful one industrially. Not only have the assets increased \$7,665.60, in spite of the withdrawal of \$5,149.96 to make good a deficiency in the appropriation for the domestic department, but a larger wage has been paid the blind workers. Of the \$13,771.45 paid in wages in the industrial department \$11,358.30 was paid to inmates in addition to the care and maintenance provided by the state. This is an increase of \$2,081.30 over the wages paid to the blind during the previous year.

We do not believe there are many, if any, workshops for the blind where a larger percentage of the wages paid goes to the blind workers.

The further increase in pay which the Directors have granted for the coming year is greatly appreciated and will tend to further improve the quality of the output of the shops.

The basket and rug weaving department lately started is increasing its production, but cannot be enlarged until the Legislature provides an appropriation for more commodious and suitable quarters.

A new employment for the blind has been found in the making of grommets, or washers made of lampwicking, for use in shipbuilding. The making of these has put several hundred dollars in the pockets of the blind, but the chief advantage is that they are easily made and provide employment for those unfitted for work in the other departments.

Men's Dormitory.

A Corner of the Garden.

Broom Factory.

REQUIREMENTS FOR THE SEVENTY-THIRD AND SEVENTY-FOURTH FISCAL YEARS.

Owing to the increased cost of supplies and the very necessary increase in salaries and wages granted by the State Civil Service Commission, the appropriations made for the fiscal year under review fell short of meeting the expenses. The deficit accruing was therefore paid out of the profits of the shops.

It is estimated that the sum of \$45,000 will be required for "salaries" and \$64,800 for "support" for the coming biennial period.

These estimates have been carefully prepared. That for salaries is based on the scale of wages now in force with a slight addition to enable the Directors to raise some salaries which are still far below those paid in other institutions. The estimate for the appropriation for support is based on the actual cost of maintenance for the past fiscal year.

The following is a list of urgent improvements and repairs for which appropriations should be made by the Legislature. The figures as to the cost of these requirements were supplied by the State Engineering Department.

Dormitory -----	\$115,000 00	
Central heating plant (building and equipment) -----	28,300 00	
Women's shop -----	30,000 00	
Smoking room -----	18,000 00	
Furniture and equipment -----	7,500 00	\$198,800 00
Miscellaneous repairs and improvements:		
Elevator for shop -----	\$3,000 00	
Painting and repairs to plumbing -----	3,000 00	
Alterations to hospital -----	700 00	
Fire escape for factory -----	750 00	
Fence in rear of grounds -----	550 00	
Refrigerator plant -----	2,000 00	\$10,000 00

Dormitory.

The need of this building is of long standing. A bill making appropriation for this addition was introduced during the last session of the Legislature, but, owing to the many demands on the treasury, failed to receive approval.

It is estimated that there are nearly two thousand blind persons in California, but as the present capacity of this institution is one hundred and forty inmates, it is evident that the state is not doing its full duty to its sightless wards.

We have upwards of fifty applications for admission on file and many more would be received were it not necessary to inform inquirers that no more blind can be admitted until further accommodations are provided by the Legislature.

Central Heating Plant.

No efficiency or economy in heating the various buildings of the Home can be effected until this plant is installed.

At the present time, there are in the various buildings two steam heating plants, three separate hot water systems, several stoves in the smaller building. Some of these systems burn fuel oil, others stove oil, gas, or coal.

Smoking Room.

This necessary accommodation is now in the women's shop building. It is unsanitary and unfit for the purpose. Above this room, in the plans figured on by the State Engineering Department, it is proposed to build rooms for the male employees who now have to be accommodated in the men's dormitory.

Women's Shop.

The chair-caning department, basket weaving and mattress shops are housed in a very dilapidated frame building. The rooms are entirely inadequate for carrying on the work and necessitate the curtailing of industries which should be enlarged. It is proposed to place rooms on the upper floor of this building for the women employees and thus help relieve the crowded condition of the women's building.

Furniture and Equipment.

This appropriation will be required to furnish the new dormitory and also to buy looms and other equipment needed in the industrial department.

Elevator, Broom shop.

The freight elevator in this shop was installed many years ago and is of obsolete type. It has been condemned as unsafe by the Industrial Accident Board.

Painting and Repairs to Plumbing.

The plumbing fixtures, faucets, etc., must be renewed. Those in the men's dormitory are of a complicated type, are not of standard make, so that parts cannot be procured in this market.

Considerable painting, both inside and outside the buildings, must be done for the protection of the state's property.

Alterations to Hospital.

When this section of the men's dormitory was planned, no provision was made for bathroom or toilet. Until this addition is made, isolation of infectious cases is impossible.

Fire Escape for Factory.

There are no means of escape from the second floor of the broom factory, except by two narrow stairways. Should a fire occur during working hours, it would be next to impossible to remove the blind workmen from the building.

Fence in Rear of Property.

In the rear of the grounds is a plot of good land about an acre in size. No fence has ever been built by the state on three sides of this property. The fences erected by the owners of the abutting lots are inadequate for the protection of the property belonging to the Home. When this fence is erected most of the vegetables used by the Home can be grown on this land.

Electric Refrigerator.

The only accommodation we have for keeping meats and produce is an ice box 3 feet by 4 feet by 5 feet. It is so small as to be practically useless. In warm weather, meat, milk and other foods are apt to spoil for want of refrigeration.

On behalf of the blind and the management, I wish to express appreciation of the kindness of many friends who have given freely of their time and talents for the entertainment of the inmates. About forty of these entertainments have been given by various organizations and individuals during the past year. Special thanks are due to those who, for years have faithfully and devotedly conducted reading classes for the inmates.

To the officers and employees, all of whom have worked loyally in the interests of the Home, my thanks are due, as also to those workers in the shops who have contributed so much to what advancement has been made in the industrial department.

Respectfully submitted.

DOUGLAS KEITH,
Superintendent.
